OBJECTIVE

Associate Software Engineer with 2 years of frontend development experience and a 6-month fullstack internship. Proficient in building web applications with React and .NET, working with SQL databases (SSMS), and implementing REST APIs, JWT authentication, and Entity Framework Core. Computer Science graduate with strong fundamentals in DSA, Operating Systems, and Networking, plus hands-on experience with FPGA and Regular Expressions. Quick learner passionate about fullstack development, with foundational knowledge of Azure and AI/ML concepts.

EXPERIENCE

• Victory Information (Pvt) Ltd [\[Link\]](#)

Associate Software Engineer (May 2024 - Present)

Mt. Lavinia, Sri Lanka

- Currently working as an Associate Software Engineer, actively contributing to UI/UX design and frontend development for web projects, while also gaining exposure to backend development and cloud deployments. Responsible for designing and developing user interfaces using modern JavaScript frameworks and libraries, including React and Next.js. Additionally, experienced in building full-stack solutions with .NET and Node.js, ensuring seamless integration between frontend and backend systems.

• WNS Global Services (Pvt) Ltd [\[Link\]](#)

Operations Associate/QA

Jan 2020 - Aug 2021

Colombo 01, Sri Lanka

- Worked in an operations associate position for more than 1 year and as a QA for 4 months.

PROJECTS

• Interpretable ML for Drug Discovery: [Final Year Research]

2025 - 2026

Tools: Python, Google Colab, LINCS L1000 Dataset

[\[Source Code:🔗\]](#)

- Research exploring machine learning methods for drug mechanism prediction using high-throughput transcriptomic data. Conducted systematic evaluation of SVM, Random Forest, and knowledge-guided deep learning models on the LINCS L1000 dataset. Addressed challenges of high-dimensional, noisy biological data by integrating external pathway knowledge to improve model robustness and interpretability.

• Sri-Care Telecom Portal: [Group Project]

Tools: Spring Boot, React, Flutter, RabbitMQ, Maria DB

December 2025 - January 2026

[\[Source Code:🔗\]](#)

- Built a full-stack customer self-care portal for a telecom provider with React web and flutter mobile apps. Developed Spring Boot backend APIs with JWT authentication, used RabbitMQ for async notification delivery. Mocked integration with telecom provisioning systems and payment gateways.

EDUCATION

• University of Ruhuna

Bachelor Of Computer Science (BCS) Honours Degree - GPA: 3.64/4.00

Matara, Sri Lanka

2022 - 2026

• S. Thomas' College (2005 - 2018)

Advanced Level - Physical Science stream

Mount Lavinia, Sri Lanka

2019

SKILLS

- **Programming Languages:** C, Python, JavaScript, TypeScript, Java, PHP
- **Frontend:** HTML, CSS, React, Next.js, TailwindCSS
- **Backend:** Node.js, Express.js, .NET (ASP.NET Core)
- **Databases:** MySQL, MongoDB
- **Design & Collaboration:** Figma, Photoshop, Blender

EXTRA-CURRICULAR & SPORTS

- **Road Race:** Captain (2023) | University Colours (Road Race) 2022, 2023
- **Hockey:** Captain (2024) | University Colours & SLUSA Colours (Hockey) 2024
- **GDG Sri Lanka:** Volunteer (2023, 2024)
